## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 6) ☐ Other: \_\_\_\_\_.

### DETAILED ACTION

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 1-8 clearly recite a computer-related method for implementing a mathematical algorithm to compute a square root of a long-bit numbers . In order for such a claimed computer-related process to be statutory, the claims must includes either a step that results in a physical transformation outside the computer or a limitation to a practical application, or requires a specific computer to implementing the claimed process. However, it is clear from claims 1-8 that the claims merely recite steps of data manipulation and computation. The input is a number and output is also a number. The claim fails to recite any step that results in a physical transformation outside the computer or a limitation to a practical application, or that requires a specific computer to implementing the claimed process. The recitation using a short-bit processor” in the preamble is a mere intended field of use, and does not requires a specific computer, and thus fails to render the invention statutory. Accordingly, claims 1-8 are clearly directed to a non-statutory subject matter.
